

When in the race to be the best, don't let your complex backup system slow you down. In today's competitive world, simple and fast wins, without leaving performance and endurance behind.

# 7 Reasons to Simplify Your Backup and Recovery for Nutanix

START YOUR FREE TRIAL

## 1 Windows Licenses

You would need to purchase up to 17 additional software licenses if you use an alternative backup solution.

Alternative Backup\*

Up to 17

HYCU

0

## 3 Duplicated Functionalities

Alternative backup solutions replicate platform level functionality like: deduplication, VM level snapshots instead of storage level snaps, disaster recovery, cloning and orchestration.

Alternative Backup\*

5

HYCU

0

## 5 Cost to Achieve Recovery Time Objectives

Alternative backup solutions require separate infrastructure and post-recovery data migration before you can access your data.

Alternative Backup\*

\$25K

HYCU

\$0

## 6 Automated App Discovery & App Consistent Backup

In this age, you should not have to manually configure your apps for backup. HYCU is the only solution that automatically discovers and backs up applications

Alternative Backup\*

HYCU

100%

## 7 Performance and Handling

All current backup products require professional services to deploy and paid training classes. HYCU is the only one that doesn't require either and gets you running in minutes.

Alternative Backup\*

COMPLEX

HYCU

SIMPLE

Meet the only purpose-built backup and recovery for the Nutanix-led datacenter without any complexity.
