Protect the keys to your IT kingdom with HYCU R-Cloud™

Don't let mistakes disrupt your operations. Prevent operational disruptions and costly rebuilds caused by data and configuration loss. Protect your IAM stack from human errors, misconfigurations, accidental deletions, and cyber threats.

HYCU R-Cloud™: Safeguard your IAM configurations

With **HYCU**, you can protect your entire data estate from a single solution, starting with your most critical data – Identity & Access Management.

Avoid loss of revenue
Restore objects and configurations swiftly to save your organization from massive financial loss due to ransomware demands and prolonged downtimes.

Protect your organization from operational disruptions
Quickly restore IAM data to restore access to critical applications and services, drastically minimizing operational disruptions after an incident.

Stay protected from third-party risks
Keep your organization safe from unforeseen technical failures or errors caused by vendors, with reliable backups in place.

Spend one minute a week on backups
Automate your backups to avoid thousands of hours of manual backup and recovery tasks, and stay on track with reporting, notifications, and 24/7 logging.

We've got your back(up)

Restore your data with one click

Minimize downtime by quickly recovering your entire tenant or a single item.

Set your backups on autopilot

Spend only a minute a week on your backups. Just set it up and let HYCU do the rest.

Own your ransomware-proof backups

Store safe immutable backups you can rely on in a cloud storage bucket that you own.

Unified, native protection across your IAM stack

Secure, autopilot protection and one-click recovery for your entire IAM stack

Ensure your mission-critical IAM data is always resilient against human error, misconfigurations, third-party risks, and cyberattacks.

One-click data restore
Restore your entire tenant or just a single resource or configuration – you have complete flexibility and control over exactly what you want to restore.

Cross-instance restore of Okta data
Restore data to another Okta WIC org or clone your entire org within minutes to safely test changes or perform a full disaster recovery.

Automated policy-based backups
Highly flexible 'set and forget' backup policies that run 24/7, providing you with backup assurance and peace of mind with logging and notifications.
Complete data estate visibility
Visualize your organization's data estate by leveraging your Okta and/or Microsoft Entra ID connections and discover unprotected data across your landscape.

Secure, immutable offsite backups
Store immutable backups in an S3 bucket owned by you and only accessible to you on Amazon S3, Azure, Google Cloud or other S3-compatible targets.

Protect Okta and Entra ID together
Protect your Okta WIC, Okta CIC, Microsoft Entra ID, and AWS IAM data together – all from a single solution.
