

Safeguard your entire tech stack without breaking the bank

HYCU Starter Bundle Overview

The HYCU Starter Bundle offers enterprise-grade data protection tailored for small businesses with fewer than 200 employees. It provides comprehensive backup and recovery solutions to safeguard your entire technology stack against downtime, data loss, and ransomware threats.

What is Included

HYCU R-Cloud™

Unlimited Protection across all of your applications

Key Features

- ✓ **One-Click Restore**
Enables rapid recovery of entire applications or specific data and configurations with a single click.
- ✓ **Automated Backup Policies**
Allows for easy assignment of backup policies or customization according to your service level agreements (SLAs) and data retention needs.
- ✓ **Built-In Disaster Recovery**
Facilitates swift failovers to the cloud and cross-regional recovery for virtual and cloud applications.
- ✓ **Secure Offsite Storage**
Supports storage of backup copies using Amazon S3, Google Cloud, Azure Blob, or S3-compatible storage buckets.
- ✓ **Set-and-Forget Experience**
Automates all backup operations with 24/7 access to logging and event tracking, providing notifications of all activities.
