

HYCU R-Cloud™

# Enterprise-Class Backup and One-Click Recovery for Box

## Why back up your Box data?

Box, like most cloud and SaaS platforms, follows a shared responsibility model, which means *you* are responsible for any loss of data in your instance. If your teams lose access to Box data, it could lead to delays, lost revenue, or even legal exposure.

- Box stores critical, high-value content that's often targeted by cybercriminals and insider threats
- Inaccessibility or loss of Box data can trigger major financial and operational setbacks – from missed deadlines to client churn
- Manual or script-based backups are clunky, error-prone, and usually out-of-date

## Protect your Box data with HYCU

- ✓ **Get back to business quickly**  
Keep work moving, even after cyberattacks, accidental deletions, or Box outages.
- ✓ **Save time and avoid costly setbacks**  
Avoid revenue loss and hours of file rebuilds with fast, reliable data recovery.
- ✓ **Ensure compliance readiness**  
Stay compliant with regulations like DORA and NIS2 with secure, off-site, customer-controlled backups.
- ✓ **Simplify backup management**  
Manage backups for 80+ workloads across on-prem, hybrid cloud, and SaaS applications from a single pane of glass.

### Our Strengths

**Google Cloud****Industry leading data protection for Google Cloud****Gartner****Recognized as a Visionary in the Gartner Magic Quadrant for Enterprise Backup and Recovery****GIGAOM****Leader in the GigaOM Cloud Native Data Protection Report****Leading in SaaS Backup, File Recovery, DRaaS, Server Backup, and Database Backup****#1 Net Promoter Score (NPS) in Data Protection**

# Enterprise-grade backup and recovery for your mission-critical data

Backing up is easy—what matters is being able to recover it when things go wrong. HYCU ensures you're covered at every step, from secure, automated backups to rapid recovery.

## One-click granular data restore

Quickly recover entire Box instances or individual files, weblinks, sub-folders, and folders with a single click.

## Customer-owned backups

Store your backups in secure storage targets you own and access—meeting data residency and sovereignty needs.

## 'Always-on' automated backups

Automate your Box backups by setting up policies that run 24/7—no scripts, no manual steps, no risk of missed data.

## Off-site data recovery

Export your Box data to an S3-compatible storage and keep your business running, even during service outages.

## Immutable, ransomware-proof protection

Store WORM-enabled, off-site copies that you can confidently restore from during a ransomware attack.

## Optimized backup storage

Smartly optimize your storage needs with incremental forever backups that eliminate the burden of taking full exports every time.

## Get started in minutes

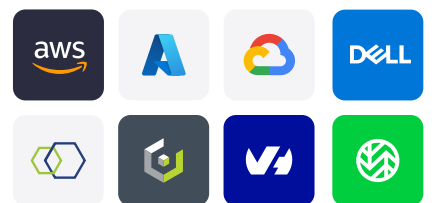

It only takes a few minutes and a couple of clicks to start protecting your **Box data with HYCU R-Cloud™**

Flexible policy-driven  
automated backups

One-click restores of instances,  
folders, files, and weblinks

Data exports offsite

1

Connect your Box instance to HYCU R-Cloud™ using your API keys

2

Configure your storage target that meets your residency and retention needs

3

Assign a backup policy with the preferred backup frequency and retention settings

4

Restore files, folders, or the entire instance, whenever you want
