

Your iManage data, protected and always accessible

Recover anything from a single document to an entire library, and ensure access to your critical documents is never interrupted.

Why you need augmented protection for your iManage data

Your most critical documents live in iManage: contracts, client documents, case files, and all your deliverables. Human error, insider actions, third-party failures, automation errors, and cyberattacks can all put that data at risk.

There is also the risk of your data being inaccessible rather than lost, whether from a cyberattack or a temporary service disruption. For a 200-attorney law firm billing at a typical rate of \$1,145 an hour, two hours of data inaccessibility represents roughly \$458,000 in just billable time.

iManage takes responsibility for keeping its cloud service secure, protected, and available. Protecting the data you put on it, and building your own resilience and independent business continuity plan around it, stays with you.

Keep your data safe and in your hands

- ✓ **Keep critical data protected**
A deleted workspace, a corrupted document, or a ransomware event. Recover exactly what you need in a single click, with no support ticket and no scripts.
- ✓ **Keep client work moving**
Your users can still reach the documents they need, even through a cloud outage, so deadlines hold and clients stay served.
- ✓ **Your copies, your storage**
Backups sit off-site in a cloud storage target you own – immutable, encrypted, and under your control.
- ✓ **Protect billable time**
Every hour your data is missing or unreachable is an hour nobody bills. Protection keeps revenue and client commitments intact.

Our Strengths

**IDC**

Named a Leader in the IDC MarketScape for Worldwide SaaS Data Protection

**Gartner**

Recognized as a Visionary in the Gartner Magic Quadrant for Enterprise Backup and Recovery

**GIGAOM**

Leader in the GigaOM Cloud Native Data Protection Report

**G2**

Leading in SaaS Backup, File Recovery, DRaaS, Server Backup, and Database Backup

#1 Net Promoter Score (NPS) in Data Protection

Our partnership with HYCU adds another layer of comprehensive data protection to the mix, giving customers the confidence and peace of mind that their data is protected from every angle.

iManage

Stay in control of your iManage data with HYCU R-Cloud™

→ Secure, off-site backups

Keep control of your data with off-site backups stored in public cloud storage you own.

→ Backup autopilot

Automate backups of your iManage data with fully customizable, set-and-forget policies that run 24/7.

→ One-click, granular data recovery

Recover workspaces, folders, and files, along with versions, metadata, and security settings.

→ Ransomware-proof protection

Recover from ransomware attacks with WORM-enabled immutable backup copies you can rely on.

→ Encryption in transit and at rest

Your data is encrypted in transit and at rest, with a choice between HYCU-managed keys and your own customer-managed encryption keys (CMEK).

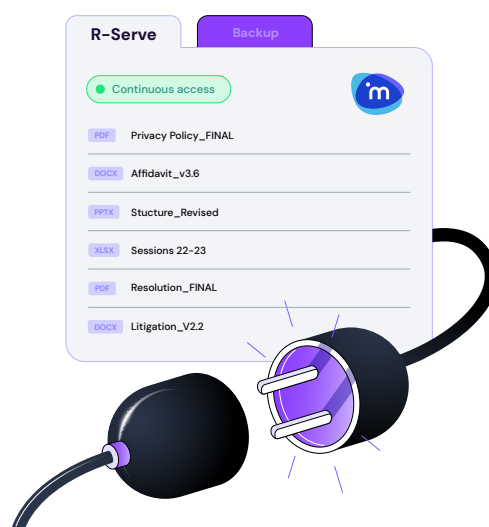

→ Built for compliance

Meet your retention, residency, and governance needs by storing and processing data where and how you need.

A second, independent path to your documents with HYCU R-Serve

R-Serve gives every user continuous access to their documents, scoped to what each user owns and operates in iManage. It runs in your own cloud and stays available at all times, so even if access is interrupted, client work carries on while service restoration proceeds.

- **Ready before you need it**
- **Easy, self-serve access**
- **Permission-aware access**
- **Your cloud, your control**
- **Familiar, iManage-like UI**
- **Get to work again in minutes**

iManage data resilience on HYCU

Safeguard your most critical data with HYCU.
